Cerro de la muerte.7z; Irazu 2021.7z; Vista al Mar.7z;

Buenas tardes ingenieros de SUTEL, la presente corresponde a dos consultas técnicas que tenemos como interesados para para participar en la Licitación Mayor N°2025LY-000003-SUTEL

1. Los canales nacionales (canal 15 UCR, canal 20 del SINART y canal 16 de la UNED), ¿permanecerán en las frecuencias actualmente asignadas?; pues estamos en proceso de diseño de una red nacional y queremos optar por un canal de televisión y no sabemos si podemos participar por las mismas (CH20, CH15 y CH16)

Se adjuntan tres diseños que actualmente pertenecen a canal 38 con las respectivas ubicaciones GPS,

2. De acuerdo a estos tres sitios adjuntos que ya tienen torres establecidas (Irazú, cerro frío, vista al mar), a cuanto potencia podemos trabajar si estamos en 1750 para cumplir con el HAAT respectivo y poder seguir utilizando los mismos

Quedamos atentos, gracias.

Respuesta Oficio MICITT-DCNT-OF-020-2021 de fecha 16 de marzo de 2021.

Estimada señora:

En respuesta a su oficio MICITT-DCNT-OF020-2021 de fecha 16 de marzo en curso, y en relación con el traslado de las plantas transmisoras del canal 38 de televisión que transmite en el segmento de frecuencias 614-620 MHz dentro del mismo Volcán Irazú por las razones ampliamente ya indicadas, formalmente presento solicitud de autorización para el cambio de ubicación de nuestras plantas transmisoras, para tal efecto se adjuntan los “formularios de solicitud de autorización de traslado de ubicación o de un punto nuevo de transmisor del servicio de radiodifusión” y “formulario de solicitud de concesiones directas en frecuencias de asignación no exclusiva” con los requisitos indicados en ellos.

Asimismo, reiteramos nuestra solicitud relacionado con el ancho de banda de las frecuencias de enlaces y que los mismos sean de 28 MHz en nuestros enlaces. Lo anterior a fin de evitar interrupciones de la señal en las temporadas de lluvia.

Recibiré notificaciones al correo electrónico comotorcr@gmail.com

Tel: 2221-5340

Agradeciéndoles de antemano por su atención a la presente.

Cordialmente,

Eduardo Alfredo Coccio Brenes
Presidente
Canal Color

**FORMULARIO PARA LA
SOLICITUD DE AUTORIZACIÓN DE TRASLADO DE UBICACIÓN O DE UN PUNTO
NUEVO DE TRANSMISOR DEL SERVICIO DE RADIODIFUSIÓN****DATOS PERSONALES (persona física o representante legal de la persona jurídica)**

Fecha: 23 de marzo de 2021

Nombre: **Eduardo Alfredo**Primer apellido: **Coccio**Segundo apellido: **Brenes**

Número de cédula: 1 0280 0653

Nacionalidad: ¡Costarricense

Ocupación: Empresario

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Dirección: Goicoechea, Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

DATOS DE LA PERSONA JURÍDICANombre o razón social: **CANAL COLOR SOCIEDAD ANÓNIMA**

Número de cédula jurídica: 3-101-094812

Dirección: Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Detalle de la actividad a la que se dedica la empresa: Radiodifusión sonora comercial de acceso libre

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

Otro medio para notificaciones: melvinmurillo7@gmail.com

Nombre del técnico responsable del trámite en la empresa/entidad: Luis Rodríguez Solano

Correo electrónico: lrodriguez@gmail.com

Teléfono: 8398-4843

REQUISITOS LEGALES

1. Las **copias de los documentos originales** que se adjunten a la solicitud deben estar **debidamente certificadas** por un Notario Público, además deben satisfacerse las especies fiscales y timbres correspondientes, lo anterior conforme lo establecido en el artículo 110 del Código Notarial, Ley N° 7764 del 17 de abril de 1998, y en los Lineamientos para el ejercicio y control del servicio notarial, Reglamento N° 6 del 13 de marzo de 2013 de la Dirección Nacional de Notariado.
2. Certificación de **Personería jurídica**, extendida por un Notario Público o por la Sección Mercantil del Registro Nacional (original y con un máximo de un mes de expedida) o emitida a través del portal de Servicios Digitales del Registro Nacional (con un máximo de 15 días naturales de expedida).
3. Cumplir con la presentación de todas las hojas de datos requeridas.
4. En el caso que se realice el trámite directamente por el representante de la persona jurídica o personalmente por el concesionario, se deberá exhibir la cédula de identidad del firmante. Caso contrario, deberá presentarse una copia de la cédula de identidad de éste.
5. Adjuntar los **documentos originales y un juego de fotocopias adicionales de todos los documentos**.
6. El formulario debe de tener la firma del solicitante o del representante legal de la persona jurídica debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los Lineamientos para el ejercicio y control del servicio notarial, salvo que sea presentada personalmente por el representante legal respectivo, para lo cual deberá ser suscrita frente a un funcionario del MICITT.
7. Deberá presentar constancia de demostre que está al día en el cumplimiento de las obligaciones obrero – patronales con la Caja Costarricense del Seguro Social (Ley N° 17 del 22 de octubre de 1943) y con el Fondo de Desarrollo Social y Asignaciones Familiares (FODESAF, artículo 22 inciso c) de la Ley N° 5662 de 23 de diciembre de 1974).
8. El solicitante deberá estar al día en sus obligaciones tributarias, lo anterior de conformidad con el mandato impuesto por el artículo 18 bis del Código de Normas y Procedimientos Tributarios y la Ley N° 9416, Ley para Mejorar la Lucha contra el Fraude Fiscal.

**REQUISITOS TÉCNICOS**

A continuación, se brindan una serie de indicaciones generales para completar la información solicitada en el presente formulario:

- a) Toda la información contenida en tabla 1 debe corresponder con la información presente en las hojas de especificaciones técnicas del fabricante para cada uno de los dispositivos o en su efecto los dispositivos detallados en el Acuerdo Ejecutivo original. Cualquier cambio de ubicación del transmisor del servicio de radiodifusión debe de cumplir con la zona de servicio dada en el Acuerdo Ejecutivo original.
- b) La localización de los emplazamientos (latitud y longitud) debe indicarse utilizando las coordenadas geográficas con el datum WGS84 en el formato decimal con mínimo 6 cifras significativas (dd°, dddddd).
- c) MSNM significa “*Metros Sobre Nivel del Mar*”.
- d) La ganancia de las antenas debe indicarse en unidades dBi, en el caso de que el fabricante proporcione el valor de la ganancia en unidades dBd, realizar la conversión utilizando la relación “Ganancia dBi = Ganancia dBd + 2,15”.
- e) Potencia Irradiada Aparente ERP empleando la relación “Potencia del equipo transmisor (dBm) + Ganancia sistemas de antenas (dBd) – Perdidas por cables y conectores (dB)”.
- f) En el caso de existir alguna particularidad en el sistema de radiodifusión, que no esté contemplado en las tablas del presente formulario, se deben indicar las aclaraciones correspondientes en la sección de información adicional.
- g) El representante legal o persona autorizada deberá completar la información detallada en la siguiente tabla, para cada punto de transmisión que pretende cambiar.

**Información de la red de radiodifusión****Tabla 1.** Equipo de estaciones trasmisoras

| Especificaciones | Ubicación actual del transmisor | Propuesta de nueva ubicación del transmisor |
|--|---------------------------------|---|
| Datos del emplazamiento | | |
| Nombre del emplazamiento | Volcán Irazú | Volcán Irazú |
| Latitud(N)(dd°, dddddd)(WGS84) | 9,972022 | 9,971444 |
| Longitud(O)(dd°, dddddd)(WGS84) | -83,862000 | -83,860718 |
| Altura del sitio (MSNM) | 3388 | 3405 |
| Provincia | Cartago | Cartago |
| Cantón | Oreamuno | Oreamuno |
| Distrito | Potrero Cerrado | Potrero Cerrado |
| Dirección exacta | Puesto Canal Color | Puesto Radsistems |
| Datos del equipo | | |
| Marca | ABE | ABE |
| Modelo | MTXD1000U | MTXD1000U |
| Rango de operación (MHz) | 470-806 MHz | 470-806 MHz |
| Potencia de salida (dBm) | 60 dBm | 60 dBm |
| Datos de la antena direccional ^{(1) (2)} | | |
| Marca | ABE | ABE |
| Modelo | LB13S/A | LB13S/A |
| Rango de operación (MHz) | 470-806 MHz | 470-806 MHz |
| Ganancia (dBi) | 13.7 dBd | 13.7 dBd |
| Altura de la antena desde el piso (m) | 25 metros | 25 metros |
| Polarización | Horizontal | Horizontal |
| Azimuth (°) | 0°, 90°, 180°, 270° | 0°, 90°, 180°, 270° |
| Angulo de elevación (°) | 0° | 0° |
| Sistema de irradiación | | |
| Segmento de frecuencias pretendido (MHz) | 614- 620 MHz (canal 38) | 614- 620 MHz (canal 38) |
| Frecuencia central (MHz) | 617 MHz | 617 MHz |
| Pérdidas por cables y conectores (dB) | 0 dB | 0 dBi |
| Potencia Radiada Isotrópica Equivalente EIRP (dBm) | 72.8 dBm | 72.8 dBm |
| Pérdidas del sistema (dB) | 3 dB | 3 dB |
| Modulación de la portadora | 64 QAM | 64 QAM |
| Código convolucional | FEC3/4 | FEC3/4 |
| Retardo de transmisión (µs) | 252 µs | 252 µs |

Notas: ⁽¹⁾ Tal y como se desprende de la tabla, con el objetivo de optimizar el uso del espectro radioeléctrico se solicita el diseño del sistema radiante con antenas direccionales.

⁽²⁾ En caso de utilizar arreglos de antenas, se solicitada completar el cuadro "datos de la antena direccional" por cada elemento radiante.

Aparte a los datos anteriores, el solicitante presentará los patrones de radiación vertical y horizontal en formato msi en pasos de un grado.

En el siguiente mapa se debe indicar la(s) zona(s) en la(s) que el solicitante requerirá operar las frecuencias, en relación con los sitios en los que desarrollará sus actividades, marcando con una **X** dentro del cuadro correspondiente (congruentes con los sitios de transmisión solicitados y las características de los equipos presentados).

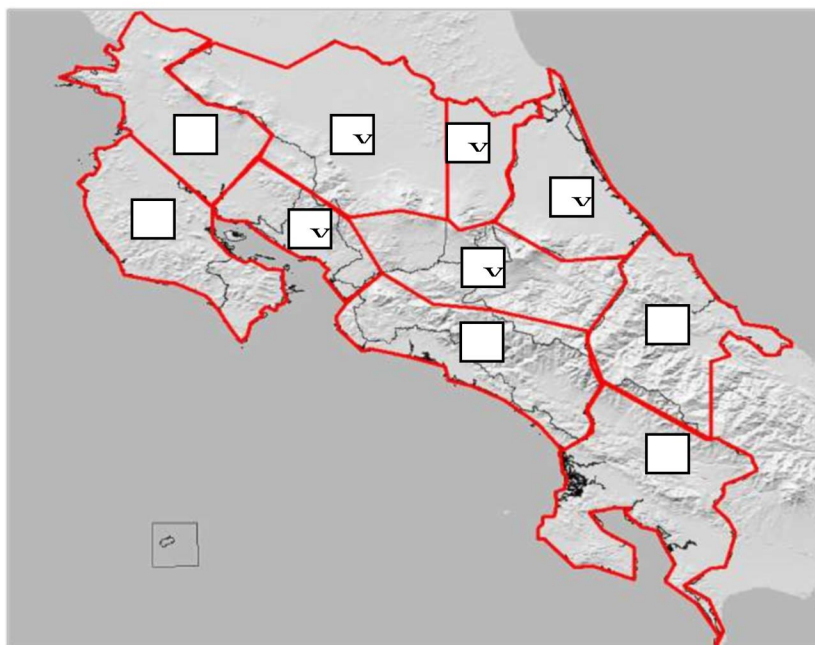

Figura 1. Zonas de acción requeridas por el solicitante.

Nota: La información proporcionada en el mapa anterior será utilizada como referencia para el estudio de la solicitud, sin embargo, la asignación de la zona de acción dependerá de los resultados del estudio técnico correspondiente.

INFORMACIÓN IMPORTANTE

1. Adicionalmente, junto con el presente formulario, la persona física o jurídica solicitante **deberá de tramitar el traslado de los enlaces en el servicio fijo entre sus puntos de generación de contenido** (estudios) y el(los) nuevo(s) punto(s) de transmisión. Por lo tanto, debe adjuntar a la presente solicitud el formulario denominado "Formulario Concesión Directa enlaces del servicio fijo" para el trámite de las concesiones directas para enlaces del servicio fijo (disponible en el sitio web: https://www.micit.go.cr/index.php?option=com_content&view=category&layout=blog&id=75&Itemid=1882), conforme lo establece el artículo 34 del Reglamento de la Ley General de Telecomunicaciones, Decreto Ejecutivo N° 34765, así como la Resolución N° RCS-118-2015, de 15 de julio de 2015, modificada mediante resolución RCS-103-2016 publicado en La Gaceta N°97 del 14 de junio de 2016, del Consejo de la SUTEL.
2. El cambio de ubicación del transmisor o la incorporación de un nuevo sitio de transmisión para el servicio de radiodifusión deberá encontrarse dentro de la zona de servicio concedida en el Acuerdo Ejecutivo original.

INFORMACIÓN ADICIONAL

Se solicita aprobar el traslado de las plantas transmisoras del canal 38 de televisión y sus enlaces dentro del mismo Volcán Irazú, por los motivos de emergencia ampliamente conocidos, presentados ante los deslizamientos acaecidos en el sitio, lo que obligó al traslado de las plantas transmisoras de Canal Color, S.A.

**DATOS DE LA PERSONA TÉCNICA RESPONSABLE**

CONSIDERACIONES FINALES

- i. **Solicitud de confidencialidad de información:** De acuerdo con el artículo 19 del Reglamento a la Ley General de Telecomunicaciones, Decreto Ejecutivo N°34765, todo solicitante de un título habilitante, podrá requerir por escrito que cierta información se declare confidencial. Si este es su caso por favor indicarlo expresamente por escrito.
- ii. De conformidad con los artículos 4 y 5 de la Ley de Protección al Ciudadano del Exceso de Requisitos y Trámites Administrativos, N° 8220; para conocer sobre el estado de su trámite por favor enviar un correo electrónico a la dirección: notificaciones.telecom@micit.go.cr

DECLARATORIA

Declaro conocer la legislación que rige esta materia y me comprometo a acatar las disposiciones actuales y las que se dicten en el futuro. Asimismo, la información contemplada en la presente solicitud es verdadera.

**Firma del solicitante y/o del
representante legal.**

La firme debe de estar debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los LINEAMIENTOS PARA EL EJERCICIO Y CONTROL DEL SERVICIO NOTARIAL.

TX station: Canal Color 38
Frequency: 617.00 MHz
Gain solid integration : enabled

Locality: Volcan Irazu nuevo

Irradiation Solid to 70 dBuV/m (Free space)

SERIE MTX: MULTI-ESTANDARD MULTIMODO LINEA DE TRANSMISORES DIGITALES & ANALOGICOS

EJEMPLO DE CONFIGURACION:

1,2KW TRANSMISOR TV DIGITAL UHF (UN EXCITADOR- UN AMPLIFICADOR)

Filtro de Salida

MTX – Excitador

Amplificador 1250W

Interruptor principal

La serie “MTX” son transmisores / reemisores definidos por software, fácilmente configurables o re-configurable como: analógico o digital, son unidades multi - estándar.

ANALOGICO - DVB-T/H - DVB-T2 - ISDB-T/Tb - ATSC

MTX D 1K /U DIAGRAMA EN BLOQUE

MTX D 1K /U Especificaciones estándar

ESPECIFICACIONES GENERALES

| | |
|---|---|
| Rango de frecuencia de salida:: | UHF de 470 a 860MHz en pasos de 1Hz |
| Potencia de salida (antes del filtro de salida): | 1200Wrms (tol. +0/-1dB) |
| Conector de salida: | Flange 7/8" |
| MER: | ≥ 35dB |
| Shoulders attenuation (antes del filtro de salida): | 38dB typ.; (min. ≥ 36dB) |
| Mueble: | Rack 19" 25U; dimensión: 570 x 1250 x 870 mm (W x H x D) |
| Consumo eléctrico: | typ. 5KVA (max 6KVA) |
| Alimentación: | 230Vac ±10% 50/60Hz Monofásico o trifásico. (Diferentes valores y tolerancias están disponibles) |

Notas:

Para especificaciones estándar y descripción general, por favor, vea el folleto: "serie MTX".
Para especificaciones técnicas del excitador de TV, por favor, vea el folleto: "serie MTX unidad de excitación"

Todas las especificaciones contenidas en este documento pueden cambiar sin aviso previo.

UHF ANTENNA PANEL

The high quality, professional and cost-effective solution

The **LB 13/SA** antenna panel, horizontal polarized, broad-band over the entire UHF frequency range, is rugged in construction and designed to be durable and resistant to extreme weather conditions.

The **LB 13/SA** antenna panel is the basic unit from which more complex antenna systems may be built, designed to obtain radiation patterns which give the best performance in the areas to be served.

Radiation Patterns @ 665MHz

LB 13/SA Gain (referred to half wave dipole - dBd) Vs. frequency

Note: for gain referred to isotropic radiator (dBi) data in dBd has to be increased by 2.2dB

LB 13/SA VSWR Vs. frequency

Note: VSWR 1.1 correspond to 26.4dB return loss

Mechanical drawing

Technical data

ELECTRICAL SPECIFICATIONS

| | |
|---------------------------------|---|
| Frequency range: | 470÷860 MHz |
| Average gain ($\lambda/2$): | 11.5 dBd |
| Average gain (ISO): | 13.7 dBi |
| Impedence: | 50 Ω |
| Max VSWR: | 1.1:1 |
| Max Power: | 2kW |
| Connector: | 7/16 (f) – option: EIA flange 7/8" (on request, also "N" female with reduced max power) |
| Horizontal beam-width (@ -3dB): | about 64° |
| Vertical beam-width (@ -3dB): | about 27° |
| Polarization: | horizontal (H) |

MECHANICAL SPECIFICATION

| | | |
|------------|---|--|
| Materials | Reflector and screws: | stainless steel AISI 304 |
| | Radome: | fiber-glass (grey color – on request other colors) |
| | Dipoles/splitters/lines: | silver plated brass |
| | Isolating material for splitters/lines: | Teflon® (PTFE) |
| | O-rings: | silicone |
| Mounting: | by means of 4 screws M8 | |
| Weight: | 12Kg. | |
| Wind load: | front 530N @ 160Km/h side 270N @ 160Km/h | |

AVAILABLE MAIN OPTIONS:

- Power splitters
- Connecting cables
- Antenna array design

FORMULARIO DE SOLICITUD DE CONCESIONES DIRECTAS EN FRECUENCIAS DE ASIGNACION NO EXCLUSIVA

DATOS PERSONALES (persona física o representante legal de la sociedad)

Fecha: 23 de marzo de 2021

Nombre: **Eduardo Alfredo**

Primer apellido: **Coccio**

Segundo apellido: **Brenes**

Número de cédula: 1 0280 0653

Nacionalidad: Costarricense

Ocupación: Empresario

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Dirección: Dirección: Goicoechea, Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

DATOS DE LA EMPRESA/ENTIDAD

Nombre o razón social: **CANAL COLOR SOCIEDAD ANÓNIMA**

Número de cédula jurídica: 3-101-094812

Dirección: Dirección: Goicoechea, Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Detalle de la actividad a la que se dedica la empresa: Radiodifusión Televisiva comercial de Acceso libre

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

Otro medio para notificaciones: melvinmurillo7@gmail.com 7076-6112

Encargado del trámite en la empresa: Eduardo Alfredo Coccio Brenes

Correo y teléfono: comotorcr@gmail.com 2236-2854

REQUISITOS QUE SE DEBEN CUMPLIR PARA PRESENTAR LA SOLICITUD.

Establecer como requisitos de admisibilidad para las solicitudes a que hace referencia los artículos 34 y 134 del Reglamento a la Ley General de Telecomunicaciones y que se presenten ante la Superintendencia de Telecomunicaciones, los siguientes:

1. Presentarse en idioma español o con su debida traducción oficial, conforme al Sistema Internacional de Unidades de Medidas (Ley N° 5292 del 9 de agosto del 1973 y su reglamento).
2. Las personas físicas deberán indicar el nombre, apellidos, número de identificación y calidades del solicitante. Cuando se trate de personas jurídicas deberán indicar la razón social, el número de cedula jurídica y presentar personería jurídica donde conste quien es el representante legal y/o copia del poder del apoderado que la representa. Asimismo, deberán presentar certificación de capital accionario emitida por Notario Público. Adicionalmente tanto las personas físicas como jurídicas, deberán de presentar un medio donde recibir notificaciones (fax o correo electrónico).
3. Estar firmada por el solicitante, el representante legal y/o apoderado con facultades suficientes para representarla. Dicha firma debe estar debidamente autenticada por un Notario Público.
4. Aportarse copia de la cedula de identidad o pasaporte del solicitante. En caso de ser persona jurídica, copia de la cédula de identidad o pasaporte del representante legal y/o apoderado solicitante.
5. Para los solicitantes que ya cuenten con un título habilitante, deberán señalar el número de acuerdo ejecutivo o resolución que los habilita a prestar servicios disponibles al público.
6. Para el caso de radiodifusores, presentar declaración jurada rendida ante Notario Público donde se indique que la utilización de los enlaces en el servicio fijo serán únicamente para sus propios fines (auto prestación) entre sus puntos de generación de contenido (estudios) y los puntos de transmisión o entre puntos de transmisión de acuerdo con los requisitos técnicos aportados en su solicitud. El plazo de la concesión se contabilizará partir de la entrada en vigencia del Reglamento de radiocomunicaciones, esto con el fin que se brinde el mismo plazo que la concesión de las frecuencias principales. Asimismo, las frecuencias accesorias para enlaces punto a punto deberán añadirse a los respectivos contratos de concesión de la frecuencia matriz, en caso que la concesionaria no cuente con el respectivo contrato, deberá suscribirlo con el Estado, como requisito previo a atender cualquier solicitud.
7. El solicitante deberá indicar de forma expresa el plazo de instalación y entrada en operación de los sistemas de telecomunicaciones solicitados a partir de la notificación del respectivo Acuerdo Ejecutivo por parte del Poder Ejecutivo.
8. Los solicitantes de concesión directa deberán detallar ampliamente la utilización que se le pretende dar al sistema (bandas del espectro), donde se justifique la necesidad del servicio y la explotación racional del espectro radioeléctrico.
9. Estar al día en el cumplimiento de las obligaciones obrero – patronales con la Caja Costarricense del Seguro Social (Ley N° 17 del 22 de octubre de 1943).

Aportar declaración jurada en donde el interesado señale que conoce y respetará la condiciones establecidas para la operación y explotación de redes y la prestación de los servicios de telecomunicaciones, uso y explotación del espectro radioeléctrico. La declaración jurada debe ser otorgada ante Notario Público y además debe indicar que el solicitante conoce y se compromete expresamente a cumplir con el ordenamiento jurídico, regulaciones, directrices, normativa y demás legislación aplicable en materia de telecomunicaciones y espectro radioeléctrico.

1. Presentar la solicitud y documentos anexos en original.
2. Para el caso de los solicitantes que no cuenten con título habilitante para la prestación de servicios de telecomunicaciones, deberán de presentar los siguientes requisitos adicionales:
 - a. Deberá acreditar su capacidad financiera. Para ello deberá aportar los estados financieros certificados del solicitante o en su defecto un estudio de factibilidad financiera del proyecto de telecomunicaciones específico.
 - b. Indicar el servicio de telecomunicaciones para el que se solicita la concesión directa y el tipo de red por implementar, con base en la nomenclatura establecida en el anexo I. Deberá aportar un diagrama detallado de toda la red a implementar.
 - c. Descripción detallada de las condiciones comerciales bajo las cuales se ofrecerán a los usuarios finales y/o otros operadores y proveedores los servicios de telecomunicaciones para los cuales se solicita la concesión directa, incluyendo precios y paquetes disponibles. Se deberá de indicar con claridad si este servicio será proporcionado a usuarios finales o a otros operadores y proveedores con título habilitante.
3. Indicar expresamente si se requiere se declare la confidencialidad de la información aportada. Para ello debe:
 - d. Identificar con claridad la información que se desea se declare confidencial.
 - e. Describir las razones que motivan su solicitud y por las cuales se considera que la revelación de la información podría resultar en un perjuicio competitivo sustancial para el solicitante.
 - f. Indicación del plazo durante el cual se requiere perdure la declaratoria de confidencialidad de la información.

En caso de no solicitarse la declaratoria de confidencialidad de la información, se entenderá que toda la información presentada es pública.

Instruir que el procedimiento que llevará la SUTEL para la remisión al Poder Ejecutivo de los dictámenes técnicos requeridos como parte del proceso de concesión directa que debe efectuar el Poder Ejecutivo para el otorgamiento de los enlaces del servicio fijo en frecuencias de asignación no exclusiva según las notas nacionales CR 047, CR 079, CR 080, CR 083, CR 084, CR 085, CR 086. Con fundamento en lo dispuesto en el artículo 34 del Reglamento de la Ley General de Telecomunicaciones, el procedimiento de instrucción que realiza la SUTEL se iniciará una vez remitida oficialmente por parte del Poder Ejecutivo la respectiva solicitud, siempre y cuando cumpla con los requisitos de la presente resolución, la cual deberá contener un *“Proyecto de Emplazamientos y Enlaces punto a punto del servicio fijo”* con las especificaciones que se detallan en el siguiente cuadro:

Tabla 1. Sistemas de enlaces punto a punto.

Consideraciones finales

- **Solicitud de confidencialidad de información:** De acuerdo con el artículo 19 del Reglamento a la Ley General de Telecomunicaciones, Decreto Ejecutivo N°34765, todo solicitante de un título habilitante, podrá requerir por escrito que cierta información se declare confidencial. Si este es su caso por favor indicarlo expresamente por escrito.
- De conformidad con los artículos 4 y 5 de la Ley de Protección al Ciudadano del Exceso de Requisitos y Trámites Administrativos, N° 8220; para conocer sobre el estado de su trámite por favor enviar un correo electrónico a la dirección: **consultas_concesiones@telecom.go.cr**

DECLARATORIA

Declaro conocer la legislación que rige esta materia y me comprometo a acatar las disposiciones actuales y las que se dicten en el futuro. Asimismo, la información contemplada en la presente solicitud es verdadera.

**Firma del solicitante y/o del
representante legal.**

La firme debe de estar debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los LINEAMIENTOS PARA EL EJERCICIO Y CONTROL DEL SERVICIO NOTARIAL.

ENLACES DIGITALES DE MICROONDAS PARA TV STL (FIJOS) Y MÓVILES

La solución rentable, profesional y de alta calidad.

La innovadora serie “DML” de Enlaces **Digitales de Microondas** para aplicaciones digitales y móviles representa el último desarrollo basado en la experiencia y conocimiento tecnológico en microondas digitales de ABE. Ésta experiencia ha sido acumulada al producir miles de unidades desde 1982, cuando comenzó la primera serie de Enlaces “PM”.

Éstos son Enlaces Digitales ágilmente sintetizados, sumamente compactos y flexibles con precios competitivos (inclusive en comparación con los análogos).

La serie “DML” representa un gran paso hacia la difusión y aplicación de las últimas tecnologías digitales.

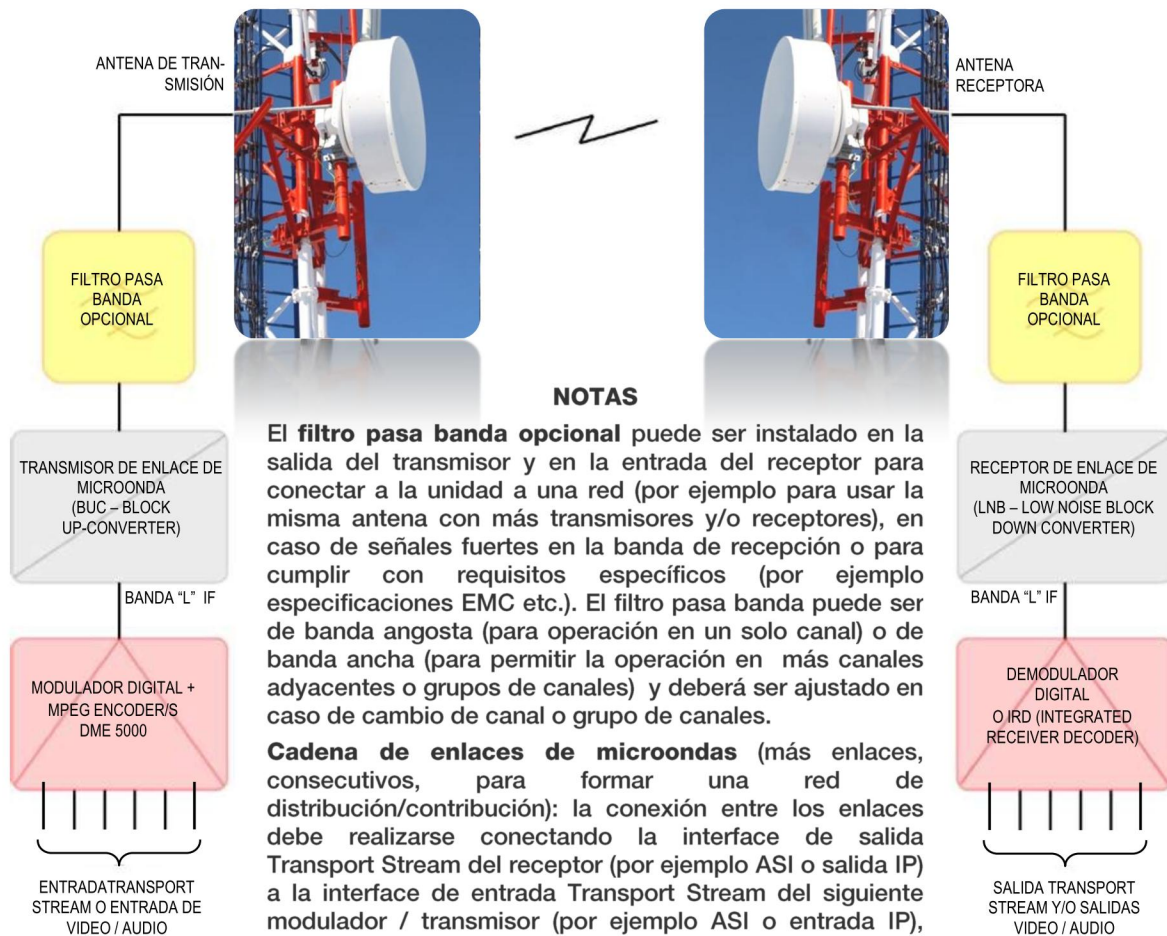

Características principales:

- ASI o Ethernet (Video Over IP) interfaces de entrada/salida con bit rate de hasta 100Mbit/s.
- Esquemas de modulación soportados: DVB-S/S2 o OFDM (DVB standard)
- Capaz de apoyar, en algunas circunstancias, condición de NLOS (Non Line Of Sight - esquema de modulación OFDM)
- Capaz de acarrear hasta #6 diferentes MPEG Transport Stream (DVB-S2 modo multistream)
- Opción de entradas y salidas de video/audio digitales o analógicas.
- Versiones de codificadores y decodificadores con hasta 4 video/dual audio HD/SD MPEG de alto desempeño.
- Totalmente ágil en toda la banda de frecuencias
- Antenas parabólicas estándar o offset
- Versiones con tripode

Usos:

- Enlaces fijos (STL – Studio Transmitter Link)
- Enlaces móviles (ej.: for O.B. Van)
- Distribución/Contribución a redes de enlaces de microonda terrestres.

Unidad externa montada en tripode

ESPECIFICACIONES GENERALES

| | |
|---|---|
| Rango de frecuencia: | DML 2: 2.15 a 2.7GHz DML 7: 5.7 a 6.54GHz; 6.54 a 7.5GHz; 7.5 s 8.6GHz (Nº3 Sub-bandas) DML10: 10.1 a 10.9GHz DML13: 12.7 a 13.75GHz DML14: 14.0 a 14.5GHz |
| Otros modelos con diferente rango de frecuencia: | Por favor contacte a la oficina de ventas de ABE. |
| Frecuencia IF : | Banda "L" (950 a 2150MHz) |
| Tipo de Modulación y capacidad de información: | QPSK (DVB-S EN 300 421) hasta 33.4Mbit/s en 28MHz ancho de banda hasta 23.8Mbit/s en 20MHz ancho de banda 8PSK (DVB-S2 EN 302 307) hasta 61Mbit/s en 28MHz ancho de banda hasta 43.5Mbit/s en 20MHz ancho de banda 16APSK (DVB-S2 EN 302 307) hasta 81Mbit/s en 28MHz ancho de banda 32APSK (DVB-S2 EN 302 307) hasta 101Mbit/s en 28MHz ancho de banda OFDM (DVB standard) hasta 31.1Mbit/s en 8MHz ancho de banda |
| Rango de temperatura de funcionamiento: | -5° a +45°C (para unidades internas) -30° a +50°C (para unidades externas) |
| Rango de humedad relativa de funcionamiento: | hasta 95% - Sin condensación |
| Alimentación: | 230Vac ±10% 50-60Hz (Opción: Otros voltajes y tolerancias AC o DC contra pedido) |
| Mueble: | Mueble estándar para rack 19" 1U para unidades internas (IDU); Caja sellada para uso exterior para unidades externas (ODU) |

MODULADOR DIGITAL de Banda "L" IF– MPEG ENCODERS – UNIDADES INTERNAS

| | |
|---|---|
| Consulte la documentación específica (folletos) DME 5000/S-DSNG-S2 | Modulador digital Banda "L" con digital entrada Transport Stream o 1 a 4 MPEG-2 y/o MPEG-4 (H.264 HD/SD) encoders |
|---|---|

CONVERTIDOR DE TRANSMISIÓN (BUC Block Up-Converter) – UNIDAD EN EXTERIORES

| | |
|--|---|
| Impedancia de conector de entrada Banda "L" IF: | 50Ω / "N" hembra |
| Potencia de salida (@ gain compression): | 1W (+30dBm – tol. ±1.5dB) o 2W (+33dBm – tol. ±1.5dB) de acuerdo al modelo Opción: amplificadores de mayor potencia |
| Retroceso típico de potencia de acuerdo al sistema de modulación: | QPSK: -3dB 8PSK: -4dB 16APSK: -6dB 32APSK: -8dB OFDM: -10dB |
| Estabilidad de frecuencia: | ≥ 2.5 x 10 ⁻⁶ (2.5ppm) |
| Impedancia de salida y conector: | 50Ω / "N" hembra o guía de onda, de acuerdo con el rango de frecuencia |
| Alimentación: | 18 a 24V DC a través del cable IF |
| Versiones disponibles: | Simplificada: sólo up-converter con amplificador de potencia Estándar: completo con 10MHz de referencia, AGC, telemetría, y predisposición para filtro de salida |

CONVERTIDOR DE RECEPCIÓN (LNB - Low Noise Block Down-Converter) – UNIDAD EXTERNA

| | |
|--|---|
| Impedancia de entrada y conector: | 50Ω / "N" hembra o guía de onda, de acuerdo al rango de frecuencia |
| Banda "L" IF impedancia de salida / conector: | 50Ω / N hembra |
| Ganancia: | 30 a 35dB (típica ganancia máxima) |
| Noise figure: | 1.2dB (típica) |
| Fuente de poder: | 12 to 18V DC a través de cable IF |
| Versiones disponibles: | Simplificada: sólo para low noise down-converter Estándar: alto rendimiento, ganancia ajustable, predisposición para filtro de entrada |

DEMODULADORES DE IF (BANDA "L") (Receptores y IRDs - Integrated Receiver Decoder) – UNIDADES INTERNAS

Consulte la documentación específica (folletos)

IRD 1001/AW:

DVB-S Banda digital "L" IRD con decodificador en MPEG-2

IRD 5001/AW:

DVB-S/S2 Banda digital "L" IRD con decodificador en MPEG-2 y MPEG-4 H.264 HD/SD

RXS 1000:

DVB-S/S2 Banda digital "L" con receptor multistream (Salida Transport Stream)

Otras soluciones de receptor:

DVB-S/S2 Banda digital "L" con receptor integrado para los transmisores de televisión.

RENDIMIENTO DE ENLACES

Ancho de banda necesario (canal):

De acuerdo a los ajustes de symbol rate y roll-off factor (hasta 40MHz)

Transport stream bit-rate (capacidad del Enlace):

De acuerdo al sistema de modulación, code rate, symbol rate, etc. (hasta 100Mbit/s)

Señal Mínima de entrada del receptor:

De acuerdo al sistema de modulación, code rate, symbol rate (umbral de recepción menos de -90dBm)

Ejemplo 1:

Con 14.8MS/s, 35% roll-off, 7/8 code rate, DVB-S QPSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es 23.9Mbit/s, suficiente capacidad para cuatro programas Video/Dual-Audio con excelente calidad de transmisión, en el mismo ancho de banda de un enlace de televisión análogo (cerca de 20MHz) con un umbral de recepción de aproximadamente -90dBm.

Ejemplo 2:

Con 16MS/s, 25% roll-off, 3/4 code rate, DVB-S2 8PSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es hasta 34.8Mbit/s en el mismo ancho de banda (cerca de 20MHz) de un enlace análogo de microonda de television con un umbral de recepción de aproximadamente -90dBm.

Ejemplo 3:

Con 23.3MS/s, 20% roll-off, 9/10 code rate, DVB-S2 32APSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es hasta 101.5Mbit/s en un ancho de banda ocupado por un Enlace estándar (28MHz) con un umbral de recepción de aproximadamente -80dBm.

10GHz BUC (Block Up Converter)

7GHz LNB
(Low Noise Block Down Converter)

PRINCIPALES OPCIONES DISPONIBLES:

- Filtros de entrada y salida de LNBs y BUCs
- Branching networks
- Versión estándar o simplificada de LNBs y BUCs
- Antenas parabólicas para aplicaciones fijas o móviles.

Todas las especificaciones indicadas en este documento pueden variar sin previo aviso.

Respuesta Oficio MICITT-DCNT-OF-020-2021 de fecha 16 de marzo de 2021.

Estimada señora:

En respuesta a su oficio MICITT-DCNT-OF020-2021 de fecha 16 de marzo en curso, y en relación con el traslado de las plantas transmisoras del canal 38 de televisión que transmite en el segmento de frecuencias 614-620 MHz dentro del mismo Volcán Irazú por las razones ampliamente ya indicadas, formalmente presento solicitud de autorización para el cambio de ubicación de nuestras plantas transmisoras, para tal efecto se adjuntan los “formularios de solicitud de autorización de traslado de ubicación o de un punto nuevo de transmisor del servicio de radiodifusión” y “formulario de solicitud de concesiones directas en frecuencias de asignación no exclusiva” con los requisitos indicados en ellos.

Asimismo, reiteramos nuestra solicitud relacionado con el ancho de banda de las frecuencias de enlaces y que los mismos sean de 28 MHz en nuestros enlaces. Lo anterior a fin de evitar interrupciones de la señal en las temporadas de lluvia.

Recibiré notificaciones al correo electrónico comotorcr@gmail.com

Tel: 2221-5340

Agradeciéndoles de antemano por su atención a la presente.

Cordialmente,

Eduardo Alfredo Coccio Brenes
Presidente
Canal Color

**FORMULARIO PARA LA
SOLICITUD DE AUTORIZACIÓN DE TRASLADO DE UBICACIÓN O DE UN PUNTO
NUEVO DE TRANSMISOR DEL SERVICIO DE RADIODIFUSIÓN****DATOS PERSONALES (persona física o representante legal de la persona jurídica)**

Fecha: 23 de marzo de 2021

REQUISITOS LEGALES

1. Las **copias de los documentos originales** que se adjunten a la solicitud deben estar **debidamente certificadas** por un Notario Público, además deben satisfacerse las especies fiscales y timbres correspondientes, lo anterior conforme lo establecido en el artículo 110 del Código Notarial, Ley N° 7764 del 17 de abril de 1998, y en los Lineamientos para el ejercicio y control del servicio notarial, Reglamento N° 6 del 13 de marzo de 2013 de la Dirección Nacional de Notariado.
2. Certificación de **Personería jurídica**, extendida por un Notario Público o por la Sección Mercantil del Registro Nacional (original y con un máximo de un mes de expedida) o emitida a través del portal de Servicios Digitales del Registro Nacional (con un máximo de 15 días naturales de expedida).
3. Cumplir con la presentación de todas las hojas de datos requeridas.
4. En el caso que se realice el trámite directamente por el representante de la persona jurídica o personalmente por el concesionario, se deberá exhibir la cédula de identidad del firmante. Caso contrario, deberá presentarse una copia de la cédula de identidad de éste.
5. Adjuntar los **documentos originales y un juego de fotocopias adicionales de todos los documentos**.
6. El formulario debe de tener la firma del solicitante o del representante legal de la persona jurídica debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los Lineamientos para el ejercicio y control del servicio notarial, salvo que sea presentada personalmente por el representante legal respectivo, para lo cual deberá ser suscrita frente a un funcionario del MICITT.
7. Deberá presentar constancia de demostre que está al día en el cumplimiento de las obligaciones obrero – patronales con la Caja Costarricense del Seguro Social (Ley N° 17 del 22 de octubre de 1943) y con el Fondo de Desarrollo Social y Asignaciones Familiares (FODESAF, artículo 22 inciso c) de la Ley N° 5662 de 23 de diciembre de 1974).
8. El solicitante deberá estar al día en sus obligaciones tributarias, lo anterior de conformidad con el mandato impuesto por el artículo 18 bis del Código de Normas y Procedimientos Tributarios y la Ley N° 9416, Ley para Mejorar la Lucha contra el Fraude Fiscal.

REQUISITOS TÉCNICOS

A continuación, se brindan una serie de indicaciones generales para completar la información solicitada en el presente formulario:

- a) Toda la información contenida en tabla 1 debe corresponder con la información presente en las hojas de especificaciones técnicas del fabricante para cada uno de los dispositivos o en su efecto los dispositivos detallados en el Acuerdo Ejecutivo original. Cualquier cambio de ubicación del transmisor del servicio de radiodifusión debe de cumplir con la zona de servicio dada en el Acuerdo Ejecutivo original.
- b) La localización de los emplazamientos (latitud y longitud) debe indicarse utilizando las coordenadas geográficas con el datum WGS84 en el formato decimal con mínimo 6 cifras significativas (dd°, dddddd).
- c) MSNM significa “*Metros Sobre Nivel del Mar*”.
- d) La ganancia de las antenas debe indicarse en unidades dBi, en el caso de que el fabricante proporcione el valor de la ganancia en unidades dBd, realizar la conversión utilizando la relación “Ganancia dBi = Ganancia dBd + 2,15”.
- e) Potencia Irradiada Aparente ERP empleando la relación “Potencia del equipo transmisor (dBm) + Ganancia sistemas de antenas (dBd) – Perdidas por cables y conectores (dB)”.
- f) En el caso de existir alguna particularidad en el sistema de radiodifusión, que no esté contemplado en las tablas del presente formulario, se deben indicar las aclaraciones correspondientes en la sección de información adicional.
- g) El representante legal o persona autorizada deberá completar la información detallada en la siguiente tabla, para cada punto de transmisión que pretende cambiar.

**Información de la red de radiodifusión****Tabla 1.** Equipo de estaciones trasmisoras

| Especificaciones | Ubicación actual del transmisor | Propuesta de nueva ubicación del transmisor |
|--|---------------------------------|---|
| Datos del emplazamiento | | |
| Nombre del emplazamiento | Volcán Irazú | Volcán Irazú |
| Latitud(N)(dd°, dddddd)(WGS84) | 9,972022 | 9,971444 |
| Longitud(O)(dd°, dddddd)(WGS84) | -83,862000 | -83,860718 |
| Altura del sitio (MSNM) | 3388 | 3405 |
| Provincia | Cartago | Cartago |
| Cantón | Oreamuno | Oreamuno |
| Distrito | Potrero Cerrado | Potrero Cerrado |
| Dirección exacta | Puesto Canal Color | Puesto Radsistems |
| Datos del equipo | | |
| Marca | ABE | ABE |
| Modelo | MTXD1000U | MTXD1000U |
| Rango de operación (MHz) | 470-806 MHz | 470-806 MHz |
| Potencia de salida (dBm) | 60 dBm | 60 dBm |
| Datos de la antena direccional ^{(1) (2)} | | |
| Marca | ABE | ABE |
| Modelo | LB13S/A | LB13S/A |
| Rango de operación (MHz) | 470-806 MHz | 470-806 MHz |
| Ganancia (dBi) | 13.7 dBd | 13.7 dBd |
| Altura de la antena desde el piso (m) | 25 metros | 25 metros |
| Polarización | Horizontal | Horizontal |
| Azimuth (°) | 0°, 90°, 180°, 270° | 0°, 90°, 180°, 270° |
| Angulo de elevación (°) | 0° | 0° |
| Sistema de irradiación | | |
| Segmento de frecuencias pretendido (MHz) | 614- 620 MHz (canal 38) | 614- 620 MHz (canal 38) |
| Frecuencia central (MHz) | 617 MHz | 617 MHz |
| Pérdidas por cables y conectores (dB) | 0 dB | 0 dBi |
| Potencia Radiada Isotrópica Equivalente EIRP (dBm) | 72.8 dBm | 72.8 dBm |
| Pérdidas del sistema (dB) | 3 dB | 3 dB |
| Modulación de la portadora | 64 QAM | 64 QAM |
| Código convolucional | FEC3/4 | FEC3/4 |
| Retardo de transmisión (µs) | 252 µs | 252 µs |

Notas: ⁽¹⁾ Tal y como se desprende de la tabla, con el objetivo de optimizar el uso del espectro radioeléctrico se solicita el diseño del sistema radiante con antenas direccionales.

⁽²⁾ En caso de utilizar arreglos de antenas, se solicitada completar el cuadro "datos de la antena direccional" por cada elemento radiante.

Aparte a los datos anteriores, el solicitante presentará los patrones de radiación vertical y horizontal en formato msi en pasos de un grado.

En el siguiente mapa se debe indicar la(s) zona(s) en la(s) que el solicitante requerirá operar las frecuencias, en relación con los sitios en los que desarrollará sus actividades, marcando con una **X** dentro del cuadro correspondiente (congruentes con los sitios de transmisión solicitados y las características de los equipos presentados).

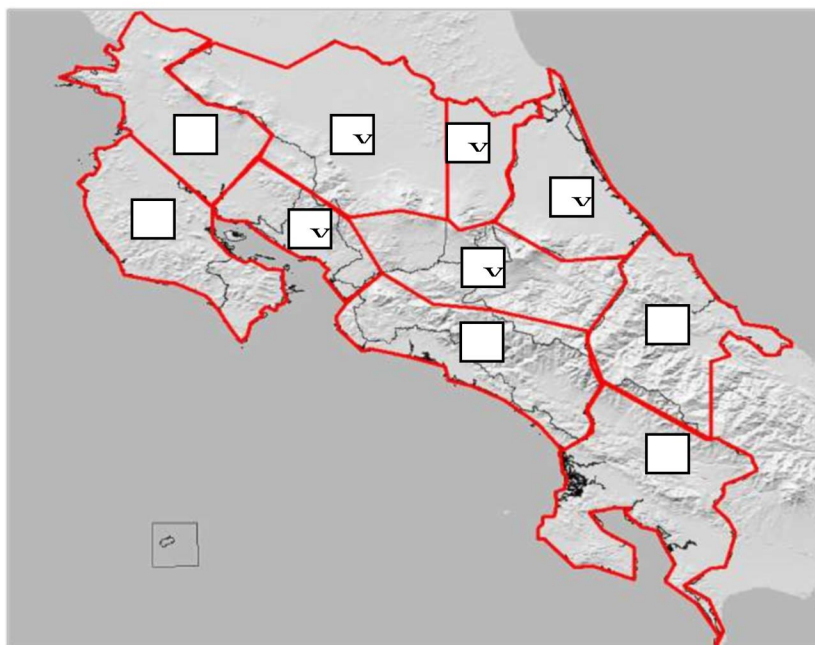

Figura 1. Zonas de acción requeridas por el solicitante.

Nota: La información proporcionada en el mapa anterior será utilizada como referencia para el estudio de la solicitud, sin embargo, la asignación de la zona de acción dependerá de los resultados del estudio técnico correspondiente.

INFORMACIÓN IMPORTANTE

1. Adicionalmente, junto con el presente formulario, la persona física o jurídica solicitante **deberá de tramitar el traslado de los enlaces en el servicio fijo entre sus puntos de generación de contenido** (estudios) y el(los) nuevo(s) punto(s) de transmisión. Por lo tanto, debe adjuntar a la presente solicitud el formulario denominado "Formulario Concesión Directa enlaces del servicio fijo" para el trámite de las concesiones directas para enlaces del servicio fijo (disponible en el sitio web: https://www.micit.go.cr/index.php?option=com_content&view=category&layout=blog&id=75&Itemid=1882), conforme lo establece el artículo 34 del Reglamento de la Ley General de Telecomunicaciones, Decreto Ejecutivo N° 34765, así como la Resolución N° RCS-118-2015, de 15 de julio de 2015, modificada mediante resolución RCS-103-2016 publicado en La Gaceta N°97 del 14 de junio de 2016, del Consejo de la SUTEL.
2. El cambio de ubicación del transmisor o la incorporación de un nuevo sitio de transmisión para el servicio de radiodifusión deberá encontrarse dentro de la zona de servicio concedida en el Acuerdo Ejecutivo original.

INFORMACIÓN ADICIONAL

Se solicita aprobar el traslado de las plantas transmisoras del canal 38 de televisión y sus enlaces dentro del mismo Volcán Irazú, por los motivos de emergencia ampliamente conocidos, presentados ante los deslizamientos acaecidos en el sitio, lo que obligó al traslado de las plantas transmisoras de Canal Color, S.A.

**DATOS DE LA PERSONA TÉCNICA RESPONSABLE**

| | |
|--|--|
| Nombre: Carlos | Primer apellido: Garino |
| Segundo apellido: Díaz | Número de cédula: 1 0637 0770 |
| Teléfono: 8380-7605 | Correo electrónico: garino.carlos@hotmail.com |
| Dirección: San José, Boicóschea, Centro Comercial de Guagayupe | Firmado digitalmente por CARLOS VIRGILIO GARINO DIAZ (FIRMA) |
| (FIRMA) | Fecha: 2021.03.23 10:37:04 -06'00' |

CONSIDERACIONES FINALES

- i. **Solicitud de confidencialidad de información:** De acuerdo con el artículo 19 del Reglamento a la Ley General de Telecomunicaciones, Decreto Ejecutivo N°34765, todo solicitante de un título habilitante, podrá requerir por escrito que cierta información se declare confidencial. Si este es su caso por favor indicarlo expresamente por escrito.
- ii. De conformidad con los artículos 4 y 5 de la Ley de Protección al Ciudadano del Exceso de Requisitos y Trámites Administrativos, N° 8220; para conocer sobre el estado de su trámite por favor enviar un correo electrónico a la dirección: notificaciones.telecom@micit.go.cr

DECLARATORIA

Declaro conocer la legislación que rige esta materia y me comprometo a acatar las disposiciones actuales y las que se dicten en el futuro. Asimismo, la información contemplada en la presente solicitud es verdadera.

Firma del solicitante y/o del
representante legal.

La firme debe de estar debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los LINEAMIENTOS PARA EL EJERCICIO Y CONTROL DEL SERVICIO NOTARIAL.

TX station: *Canal Color 38*

Locality: *Volcan Irazu nuevo*

Frequency: *617.00 MHz*

Date: *23.03.2021*

TX station: Canal Color 38

Locality: Volcan Irazu nuevo

General data of antenna System

| | |
|---|--------------------|
| TX station | Canal Color 38 |
| Locality | Volcan Irazu nuevo |
| Description | |
| Status | Non definito |
| System of coordinates | WGS84 |
| Longitude | -83°51'38.55" |
| Latitude | 9°58'17.08" |
| Ground level a.s.l. (m) | 3405.0 |
| Antenna system height (m) | 45.0 |
| Transmitter power(Watt) | 1000.000 |
| Carrier wave frequency (MHz) | 617.000 |
| Antenna system central frequency (MHz) | 617.000 |
| Antenna base diagrams type 1 | ABE-LB13/SA |
| Polarization (H/V/C/X) | H |
| Transmitting cable attenuation (dB) | 0.7 |
| Additional attenuations(dB) | 0.2 |
| Base diagrams sectors (T = All, F = Front) | T |
| Velocity factor of cables to Antennas (0÷1) | 1.00 |
| Coordinate System(Cartesian, Polar, Offset) | P |
| Mast side / diameter(cm) | 60.0 |
| Mast cross section (T/Q/C) | Q |
| Structure rotation w.r.t. North (°) | 0.0 |
| Mast rotation w.r.t. North (°) | 0.0 |

Information about antennas used in the System

| | |
|-------------------------|----------------|
| | Antenna type 1 |
| Manufacturer | ABE |
| Antenna model | LB13/SA |
| Band start(MHz) | 470 |
| Band stop(MHz) | 860 |
| diagrams Frequency(MHz) | 600 |
| Polariz (H/V/C/X) | H |
| Vertical dist (cm) | 115 |
| Height (cm) | 96.5 |
| Width (cm) | 41.5 |
| Thickness (cm) | 21 |
| Weight (Kg) | 12 |
| Maximum power (KW) | 2 |
| Gain (dBd) | 11.8 |
| North E.C. (cm) | 4 |
| East E.C. (cm) | 0 |
| Return loss (dB) | 0 |
| R.C.Phase (°) | 0 |

TX station: Canal Color 38
Frequency: 617.00 MHz
Gain solid integration : enabled

Locality: Volcan Irazu nuevo

Irradiation Solid to 70 dBuV/m (Free space)

SERIE MTX: MULTI-ESTANDARD MULTIMODO LINEA DE TRANSMISORES DIGITALES & ANALOGICOS

EJEMPLO DE CONFIGURACION:

1,2KW TRANSMISOR TV DIGITAL UHF (UN EXCITADOR- UN AMPLIFICADOR)

Filtro de Salida

MTX - Excitador

Amplificador 1250W

Interruptor principal

La serie "MTX" son transmisores / reemisores definidos por software, fácilmente configurables o re-configurable como: analógico o digital, son unidades multi - estándar.

ANALOGICO - DVB-T/H - DVB-T2 - ISDB-T/Tb - ATSC

MTX D 1K /U DIAGRAMA EN BLOQUE

MTX D 1K /U Especificaciones estándar

ESPECIFICACIONES GENERALES

| | |
|---|---|
| Rango de frecuencia de salida:: | UHF de 470 a 860MHz en pasos de 1Hz |
| Potencia de salida (antes del filtro de salida): | 1200Wrms (tol. +0/-1dB) |
| Conector de salida: | Flange 7/8" |
| MER: | ≥ 35dB |
| Shoulders attenuation (antes del filtro de salida): | 38dB typ.; (min. ≥ 36dB) |
| Mueble: | Rack 19" 25U; dimensión: 570 x 1250 x 870 mm (W x H x D) |
| Consumo eléctrico: | typ. 5KVA (max 6KVA) |
| Alimentación: | 230Vac ±10% 50/60Hz Monofásico o trifásico. (Diferentes valores y tolerancias están disponibles) |

Notas:

Para especificaciones estándar y descripción general, por favor, vea el folleto: "serie MTX".
Para especificaciones técnicas del excitador de TV, por favor, vea el folleto: "serie MTX unidad de excitación"

Todas las especificaciones contenidas en este documento pueden cambiar sin aviso previo.

UHF ANTENNA PANEL

The high quality, professional and cost-effective solution

The **LB 13/SA** antenna panel, horizontal polarized, broad-band over the entire UHF frequency range, is rugged in construction and designed to be durable and resistant to extreme weather conditions.

The **LB 13/SA** antenna panel is the basic unit from which more complex antenna systems may be built, designed to obtain radiation patterns which give the best performance in the areas to be served.

Radiation Patterns @ 665MHz

LB 13/SA Gain (referred to half wave dipole - dBd) Vs. frequency

Note: for gain referred to isotropic radiator (dBi) data in dBd has to be increased by 2.2dB

LB 13/SA VSWR Vs. frequency

Note: VSWR 1.1 correspond to 26.4dB return loss

Mechanical drawing

Technical data

ELECTRICAL SPECIFICATIONS

| | |
|---------------------------------|---|
| Frequency range: | 470÷860 MHz |
| Average gain ($\lambda/2$): | 11.5 dBd |
| Average gain (ISO): | 13.7 dBi |
| Impedence: | 50 Ω |
| Max VSWR: | 1.1:1 |
| Max Power: | 2kW |
| Connector: | 7/16 (f) – option: EIA flange 7/8" (on request, also "N" female with reduced max power) |
| Horizontal beam-width (@ -3dB): | about 64° |
| Vertical beam-width (@ -3dB): | about 27° |
| Polarization: | horizontal (H) |

MECHANICAL SPECIFICATION

| | | |
|------------|---|--|
| Materials | Reflector and screws: | stainless steel AISI 304 |
| | Radome: | fiber-glass (grey color – on request other colors) |
| | Dipoles/splitters/lines: | silver plated brass |
| | Isolating material for splitters/lines: | Teflon® (PTFE) |
| | O-rings: | silicone |
| Mounting: | by means of 4 screws M8 | |
| Weight: | 12Kg. | |
| Wind load: | front 530N @ 160Km/h side 270N @ 160Km/h | |

AVAILABLE MAIN OPTIONS:

- Power splitters
- Connecting cables
- Antenna array design

FORMULARIO DE SOLICITUD DE CONCESIONES DIRECTAS EN FRECUENCIAS DE ASIGNACION NO EXCLUSIVA

DATOS PERSONALES (persona física o representante legal de la sociedad)

Fecha: 23 de marzo de 2021

Nombre: **Eduardo Alfredo**

Primer apellido: **Coccio**

Segundo apellido: **Brenes**

Número de cédula: 1 0280 0653

Nacionalidad: Costarricense

Ocupación: Empresario

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Dirección: Dirección: Goicoechea, Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

DATOS DE LA EMPRESA/ENTIDAD

Nombre o razón social: **CANAL COLOR SOCIEDAD ANÓNIMA**

Número de cédula jurídica: 3-101-094812

Dirección: Dirección: Goicoechea, Montelimar, de la esquina suroeste de los Tribunales de Justicia, 500 metros Norte y 75 metros Este

Detalle de la actividad a la que se dedica la empresa: Radiodifusión Televisiva comercial de Acceso libre

Número de teléfono: 2236-2854 / 2221-5340

Apartado postal:

Correo electrónico para notificaciones: comotorcr@gmail.com

Número de fax para notificaciones: 2240-9038

Otro medio para notificaciones: melvinmurillo7@gmail.com 7076-6112

Encargado del trámite en la empresa: Eduardo Alfredo Coccio Brenes

Correo y teléfono: comotorcr@gmail.com 2236-2854

REQUISITOS QUE SE DEBEN CUMPLIR PARA PRESENTAR LA SOLICITUD.

Establecer como requisitos de admisibilidad para las solicitudes a que hace referencia los artículos 34 y 134 del Reglamento a la Ley General de Telecomunicaciones y que se presenten ante la Superintendencia de Telecomunicaciones, los siguientes:

1. Presentarse en idioma español o con su debida traducción oficial, conforme al Sistema Internacional de Unidades de Medidas (Ley N° 5292 del 9 de agosto del 1973 y su reglamento).
2. Las personas físicas deberán indicar el nombre, apellidos, número de identificación y calidades del solicitante. Cuando se trate de personas jurídicas deberán indicar la razón social, el número de cedula jurídica y presentar personería jurídica donde conste quien es el representante legal y/o copia del poder del apoderado que la representa. Asimismo, deberán presentar certificación de capital accionario emitida por Notario Público. Adicionalmente tanto las personas físicas como jurídicas, deberán de presentar un medio donde recibir notificaciones (fax o correo electrónico).
3. Estar firmada por el solicitante, el representante legal y/o apoderado con facultades suficientes para representarla. Dicha firma debe estar debidamente autenticada por un Notario Público.
4. Aportarse copia de la cedula de identidad o pasaporte del solicitante. En caso de ser persona jurídica, copia de la cédula de identidad o pasaporte del representante legal y/o apoderado solicitante.
5. Para los solicitantes que ya cuenten con un título habilitante, deberán señalar el número de acuerdo ejecutivo o resolución que los habilita a prestar servicios disponibles al público.
6. Para el caso de radiodifusores, presentar declaración jurada rendida ante Notario Público donde se indique que la utilización de los enlaces en el servicio fijo serán únicamente para sus propios fines (auto prestación) entre sus puntos de generación de contenido (estudios) y los puntos de transmisión o entre puntos de transmisión de acuerdo con los requisitos técnicos aportados en su solicitud. El plazo de la concesión se contabilizará partir de la entrada en vigencia del Reglamento de radiocomunicaciones, esto con el fin que se brinde el mismo plazo que la concesión de las frecuencias principales. Asimismo, las frecuencias accesorias para enlaces punto a punto deberán añadirse a los respectivos contratos de concesión de la frecuencia matriz, en caso que la concesionaria no cuente con el respectivo contrato, deberá suscribirlo con el Estado, como requisito previo a atender cualquier solicitud.
7. El solicitante deberá indicar de forma expresa el plazo de instalación y entrada en operación de los sistemas de telecomunicaciones solicitados a partir de la notificación del respectivo Acuerdo Ejecutivo por parte del Poder Ejecutivo.
8. Los solicitantes de concesión directa deberán detallar ampliamente la utilización que se le pretende dar al sistema (bandas del espectro), donde se justifique la necesidad del servicio y la explotación racional del espectro radioeléctrico.
9. Estar al día en el cumplimiento de las obligaciones obrero – patronales con la Caja Costarricense del Seguro Social (Ley N° 17 del 22 de octubre de 1943).

Aportar declaración jurada en donde el interesado señale que conoce y respetará la condiciones establecidas para la operación y explotación de redes y la prestación de los servicios de telecomunicaciones, uso y explotación del espectro radioeléctrico. La declaración jurada debe ser otorgada ante Notario Público y además debe indicar que el solicitante conoce y se compromete expresamente a cumplir con el ordenamiento jurídico, regulaciones, directrices, normativa y demás legislación aplicable en materia de telecomunicaciones y espectro radioeléctrico.

1. Presentar la solicitud y documentos anexos en original.
2. Para el caso de los solicitantes que no cuenten con título habilitante para la prestación de servicios de telecomunicaciones, deberán de presentar los siguientes requisitos adicionales:
 - a. Deberá acreditar su capacidad financiera. Para ello deberá aportar los estados financieros certificados del solicitante o en su defecto un estudio de factibilidad financiera del proyecto de telecomunicaciones específico.
 - b. Indicar el servicio de telecomunicaciones para el que se solicita la concesión directa y el tipo de red por implementar, con base en la nomenclatura establecida en el anexo I. Deberá aportar un diagrama detallado de toda la red a implementar.
 - c. Descripción detallada de las condiciones comerciales bajo las cuales se ofrecerán a los usuarios finales y/o otros operadores y proveedores los servicios de telecomunicaciones para los cuales se solicita la concesión directa, incluyendo precios y paquetes disponibles. Se deberá de indicar con claridad si este servicio será proporcionado a usuarios finales o a otros operadores y proveedores con título habilitante.
3. Indicar expresamente si se requiere se declare la confidencialidad de la información aportada. Para ello debe:
 - d. Identificar con claridad la información que se desea se declare confidencial.
 - e. Describir las razones que motivan su solicitud y por las cuales se considera que la revelación de la información podría resultar en un perjuicio competitivo sustancial para el solicitante.
 - f. Indicación del plazo durante el cual se requiere perdure la declaratoria de confidencialidad de la información.

En caso de no solicitarse la declaratoria de confidencialidad de la información, se entenderá que toda la información presentada es pública.

Instruir que el procedimiento que llevará la SUTEL para la remisión al Poder Ejecutivo de los dictámenes técnicos requeridos como parte del proceso de concesión directa que debe efectuar el Poder Ejecutivo para el otorgamiento de los enlaces del servicio fijo en frecuencias de asignación no exclusiva según las notas nacionales CR 047, CR 079, CR 080, CR 083, CR 084, CR 085, CR 086. Con fundamento en lo dispuesto en el artículo 34 del Reglamento de la Ley General de Telecomunicaciones, el procedimiento de instrucción que realiza la SUTEL se iniciará una vez remitida oficialmente por parte del Poder Ejecutivo la respectiva solicitud, siempre y cuando cumpla con los requisitos de la presente resolución, la cual deberá contener un *“Proyecto de Emplazamientos y Enlaces punto a punto del servicio fijo”* con las especificaciones que se detallan en el siguiente cuadro:

Consideraciones finales

- **Solicitud de confidencialidad de información:** De acuerdo con el artículo 19 del Reglamento a la Ley General de Telecomunicaciones, Decreto Ejecutivo N°34765, todo solicitante de un título habilitante, podrá requerir por escrito que cierta información se declare confidencial. Si este es su caso por favor indicarlo expresamente por escrito.
- De conformidad con los artículos 4 y 5 de la Ley de Protección al Ciudadano del Exceso de Requisitos y Trámites Administrativos, N° 8220; para conocer sobre el estado de su trámite por favor enviar un correo electrónico a la dirección: **consultas_concesiones@telecom.go.cr**

DECLARATORIA

Declaro conocer la legislación que rige esta materia y me comprometo a acatar las disposiciones actuales y las que se dicten en el futuro. Asimismo, la información contemplada en la presente solicitud es verdadera.

**Firma del solicitante y/o del
representante legal.**

La firme debe de estar debidamente **autenticada** por un Notario Público, conforme a lo indicado en el artículo 32 de los LINEAMIENTOS PARA EL EJERCICIO Y CONTROL DEL SERVICIO NOTARIAL.

ENLACES DIGITALES DE MICROONDAS PARA TV STL (FIJOS) Y MÓVILES

La solución rentable, profesional y de alta calidad.

La innovadora serie “DML” de Enlaces **Digitales de Microondas** para aplicaciones digitales y móviles representa el último desarrollo basado en la experiencia y conocimiento tecnológico en microondas digitales de ABE. Ésta experiencia ha sido acumulada al producir miles de unidades desde 1982, cuando comenzó la primera serie de Enlaces “PM”.

Éstos son Enlaces Digitales ágilmente sintetizados, sumamente compactos y flexibles con precios competitivos (inclusive en comparación con los análogos).

La serie “DML” representa un gran paso hacia la difusión y aplicación de las últimas tecnologías digitales.

Características principales:

- ASI o Ethernet (Video Over IP) interfaces de entrada/salida con bit rate de hasta 100Mbit/s.
- Esquemas de modulación soportados: DVB-S/S2 o OFDM (DVB standard)
- Capaz de apoyar, en algunas circunstancias, condición de NLOS (Non Line Of Sight - esquema de modulación OFDM)
- Capaz de acarrear hasta #6 diferentes MPEG Transport Stream (DVB-S2 modo multistream)
- Opción de entradas y salidas de video/audio digitales o analógicas.
- Versiones de codificadores y decodificadores con hasta 4 video/dual audio HD/SD MPEG de alto desempeño.
- Totalmente ágil en toda la banda de frecuencias
- Antenas parabólicas estándar o offset
- Versiones con tripode

Usos:

- Enlaces fijos (STL – Studio Transmitter Link)
- Enlaces móviles (ej.: for O.B. Van)
- Distribución/Contribución a redes de enlaces de microonda terrestres.

Unidad externa montada en tripode

ESPECIFICACIONES GENERALES

| | |
|---|---|
| Rango de frecuencia: | DML 2: 2.15 a 2.7GHz DML 7: 5.7 a 6.54GHz; 6.54 a 7.5GHz; 7.5 s 8.6GHz (Nº3 Sub-bandas) DML10: 10.1 a 10.9GHz DML13: 12.7 a 13.75GHz DML14: 14.0 a 14.5GHz |
| Otros modelos con diferente rango de frecuencia: | Por favor contacte a la oficina de ventas de ABE. |
| Frecuencia IF : | Banda "L" (950 a 2150MHz) |
| Tipo de Modulación y capacidad de información: | QPSK (DVB-S EN 300 421) hasta 33.4Mbit/s en 28MHz ancho de banda hasta 23.8Mbit/s en 20MHz ancho de banda 8PSK (DVB-S2 EN 302 307) hasta 61Mbit/s en 28MHz ancho de banda hasta 43.5Mbit/s en 20MHz ancho de banda 16APSK (DVB-S2 EN 302 307) hasta 81Mbit/s en 28MHz ancho de banda 32APSK (DVB-S2 EN 302 307) hasta 101Mbit/s en 28MHz ancho de banda OFDM (DVB standard) hasta 31.1Mbit/s en 8MHz ancho de banda |
| Rango de temperatura de funcionamiento: | -5° a +45°C (para unidades internas) -30° a +50°C (para unidades externas) |
| Rango de humedad relativa de funcionamiento: | hasta 95% - Sin condensación |
| Alimentación: | 230Vac ±10% 50-60Hz (Opción: Otros voltajes y tolerancias AC o DC contra pedido) |
| Mueble: | Mueble estándar para rack 19" 1U para unidades internas (IDU); Caja sellada para uso exterior para unidades externas (ODU) |

MODULADOR DIGITAL de Banda "L" IF– MPEG ENCODERS – UNIDADES INTERNAS

| | |
|---|---|
| Consulte la documentación específica (folletos) DME 5000/S-DSNG-S2 | Modulador digital Banda "L" con digital entrada Transport Stream o 1 a 4 MPEG-2 y/o MPEG-4 (H.264 HD/SD) encoders |
|---|---|

CONVERTIDOR DE TRANSMISIÓN (BUC Block Up-Converter) – UNIDAD EN EXTERIORES

| | |
|--|---|
| Impedancia de conector de entrada Banda "L" IF: | 50Ω / "N" hembra |
| Potencia de salida (@ gain compression): | 1W (+30dBm – tol. ±1.5dB) o 2W (+33dBm – tol. ±1.5dB) de acuerdo al modelo Opción: amplificadores de mayor potencia |
| Retroceso típico de potencia de acuerdo al sistema de modulación: | QPSK: -3dB 8PSK: -4dB 16APSK: -6dB 32APSK: -8dB OFDM: -10dB |
| Estabilidad de frecuencia: | ≥ 2.5 x 10 ⁻⁶ (2.5ppm) |
| Impedancia de salida y conector: | 50Ω / "N" hembra o guía de onda, de acuerdo con el rango de frecuencia |
| Alimentación: | 18 a 24V DC a través del cable IF |
| Versiones disponibles: | Simplificada: sólo up-converter con amplificador de potencia Estándar: completo con 10MHz de referencia, AGC, telemetría, y predisposición para filtro de salida |

CONVERTIDOR DE RECEPCIÓN (LNB - Low Noise Block Down-Converter) – UNIDAD EXTERNA

| | |
|--|---|
| Impedancia de entrada y conector: | 50Ω / "N" hembra o guía de onda, de acuerdo al rango de frecuencia |
| Banda "L" IF impedancia de salida / conector: | 50Ω / N hembra |
| Ganancia: | 30 a 35dB (típica ganancia máxima) |
| Noise figure: | 1.2dB (típica) |
| Fuente de poder: | 12 to 18V DC a través de cable IF |
| Versiones disponibles: | Simplificada: sólo para low noise down-converter Estándar: alto rendimiento, ganancia ajustable, predisposición para filtro de entrada |

DEMODULADORES DE IF (BANDA "L") (Receptores y IRDs - Integrated Receiver Decoder) – UNIDADES INTERNAS

| | |
|--|--|
| Consulte la documentación específica (folletos) | |
| IRD 1001/AW: | DVB-S Banda digital "L" IRD con decodificador en MPEG-2 |
| IRD 5001/AW: | DVB-S/S2 Banda digital "L" IRD con decodificador en MPEG-2 y MPEG-4 H.264 HD/SD |
| RXS 1000: | DVB-S/S2 Banda digital "L" con receptor multistream (Salida Transport Stream) |
| Otras soluciones de receptor: | DVB-S/S2 Banda digital "L" con receptor integrado para los transmisores de televisión. |

RENDIMIENTO DE ENLACES

| | |
|--|--|
| Ancho de banda necesario (canal): | De acuerdo a los ajustes de symbol rate y roll-off factor (hasta 40MHz) |
| Transport stream bit-rate (capacidad del Enlace): | De acuerdo al sistema de modulación, code rate, symbol rate, etc. (hasta 100Mbit/s) |
| Señal Mínima de entrada del receptor: | De acuerdo al sistema de modulación, code rate, symbol rate (umbral de recepción menos de -90dBm) |
| Ejemplo 1: | Con 14.8MS/s, 35% roll-off, 7/8 code rate, DVB-S QPSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es 23.9Mbit/s, suficiente capacidad para cuatro programas Video/Dual-Audio con excelente calidad de transmisión, en el mismo ancho de banda de un enlace de televisión análogo (cerca de 20MHz) con un umbral de recepción de aproximadamente -90dBm. |
| Ejemplo 2: | Con 16MS/s, 25% roll-off, 3/4 code rate, DVB-S2 8PSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es hasta 34.8Mbit/s en el mismo ancho de banda (cerca de 20MHz) de un enlace análogo de microonda de television con un umbral de recepción de aproximadamente -90dBm. |
| Ejemplo 3: | Con 23.3MS/s, 20% roll-off, 9/10 code rate, DVB-S2 32APSK modulation scheme, la entrada neta de bit-rate (Transport Stream bit-rate / Capacidad de información del enlace) es hasta 101.5Mbit/s en un ancho de banda ocupado por un Enlace estándar (28MHz) con un umbral de recepción de aproximadamente -80dBm. |

10GHz BUC (Block Up Converter)

7GHz LNB
(Low Noise Block Down Converter)

PRINCIPALES OPCIONES DISPONIBLES:

- Filtros de entrada y salida de LNBs y BUCs
- Branching networks
- Versión estándar o simplificada de LNBs y BUCs
- Antenas parabólicas para aplicaciones fijas o móviles.

Todas las especificaciones indicadas en este documento pueden variar sin previo aviso.

ABE ELETTRONICA

TX station: *Canal Color 38*
Locality: *Volcan Irazu nuevo*
Frequency: *617.00 MHz*

Date: *23.03.2021*

TX station: Canal Color 38

Locality: Volcan Irazu nuevo

General data of antenna System

| | |
|---|--------------------|
| TX station | Canal Color 38 |
| Locality | Volcan Irazu nuevo |
| Description | |
| Status | Non definito |
| System of coordinates | WGS84 |
| Longitude | -83°51'38.55" |
| Latitude | 9°58'17.08" |
| Ground level a.s.l. (m) | 3405.0 |
| Antenna system height (m) | 45.0 |
| Transmitter power(Watt) | 1000.000 |
| Carrier wave frequency (MHz) | 617.000 |
| Antenna system central frequency (MHz) | 617.000 |
| Antenna base diagrams type 1 | ABE-LB13/SA |
| Polarization (H/V/C/X) | H |
| Transmitting cable attenuation (dB) | 0.7 |
| Additional attenuations(dB) | 0.2 |
| Base diagrams sectors (T = All, F = Front) | T |
| Velocity factor of cables to Antennas (0÷1) | 1.00 |
| Coordinate System(Cartesian, Polar, Offset) | P |
| Mast side / diameter(cm) | 60.0 |
| Mast cross section (T/Q/C) | Q |
| Structure rotation w.r.t. North (°) | 0.0 |
| Mast rotation w.r.t. North (°) | 0.0 |

Information about antennas used in the System

| | |
|-------------------------|----------------|
| | Antenna type 1 |
| Manufacturer | ABE |
| Antenna model | LB13/SA |
| Band start(MHz) | 470 |
| Band stop(MHz) | 860 |
| diagrams Frequency(MHz) | 600 |
| Polariz (H/V/C/X) | H |
| Vertical dist (cm) | 115 |
| Height (cm) | 96.5 |
| Width (cm) | 41.5 |
| Thickness (cm) | 21 |
| Weight (Kg) | 12 |
| Maximum power (KW) | 2 |
| Gain (dBd) | 11.8 |
| North E.C. (cm) | 4 |
| East E.C. (cm) | 0 |
| Return loss (dB) | 0 |
| R.C.Phase (°) | 0 |
